Achievement has no boundaries

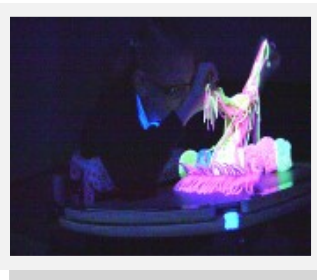

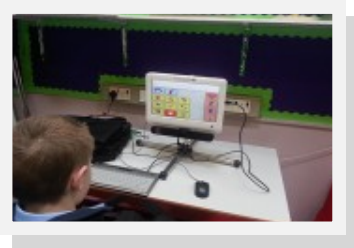

Communication & Sensory

Together with our pupils we aim to provide individual Speech and Language therapy programmes, assessment, advice and resources for those pupils who need alternative or augmentative communication (AAC)

We aim to support staff and parents with implementing a Total Communication Approach through supporting the use of high tech and low tech AAC including objects of reference, photos, symbols, signing and using the spoken word.

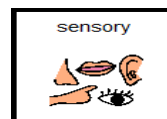

As a team we support Class Teachers and staff when setting Individual Education Plan (IEP) targets for pupils.

We support use of the specialist sensory rooms for light and dark work, for pupils with visual or hearing impairment.

We facilitate whole class and whole school sensory based activities, such as: multi-sensory story telling , TACPAC.

We provide support and training to staff/parents/ carers and other professionals, including:

Signalong, communication focused training called Elklan and Intensive Interaction.

Activities

Communication focused support—through 1:1 sessions, group sessions, IEP planning and class based support.

Individual sensory based sessions, targeted at supporting the sensory needs of the pupils.

We provide a range of whole school based activities, such as sensory stories and Modern Foreign Language week.
